**Description of Noncompliance :**

Description of the Noncompliance : FMVSS No. 111, Rear Visibility, requires the rear visibility system of vehicles manufactured on or after May 1, 2018 to return to a default image at the beginning of each backing event regardless of any modifications the driver previously selected. On affected vehicles, a driver may potentially adjust the rear view camera and display settings to the degree that the image is no longer visible, and the system will retain those settings at the next backing event. This condition does not meet the requirements of S5.5.6 Default View as required by FMVSS No. 111.

FMVSS 1 : 111 - Rearview mirrors

FMVSS 2 : NR

Description of the Safety Risk : A temporarily reduced rear visibility when the driver has adjusted the display to this extent could lead to an increased risk of an accident in the event the driver does not re-adjust the display before reversing.

Description of the Cause : NR

Identification of Any Warning that can Occur : There is no preceding warning.

Nissan will supplement this description of its determination.

## Description of Remedy :

Description of Remedy Program : Nissan is developing a plan for the implementation of software updates for all affected vehicles. Nissan will supplement its description of corrective action.

We will not include a statement in the Part 577 owner notification concerning reimbursement for the cost of obtaining a pre-notification remedy as the subject vehicles are under warranty.

How Remedy Component Differs from Recalled Component : The new rear visibility system software will limit the range of the camera display performance adjustments to meet the Default View requirements of FMVSS 111.
