Notes: This vehicles-in-operation table is a quarterly feature in *Automotive News*. It shows the number of vehicles of a particular make registered in the United States. Figures for most brands are split into two columns — vehicles more than 5 years old and vehicles 5 years old and below — to give a sense of the population that may be covered by a new-car warranty. Some former standalone brands may be listed under newer corporate entities. Volvo, for example, appears under Geely. And Peugeot is listed under Stellantis.
